

WORKSHOP MFG

MARCH 28 AND 29 2017 – PROGRAM

Tuesday 28th.

Time	Speaker	Title
09h30-10h00	Welcome	
10h00-10h55	Dylan Possamaï	A tale of a Principal and many Agents
11h00-11h35	Rinel Foguen	On selection approaches for a linear quadratic mean field game model
11h40-12h15		Presentation of the ANR project
12h30-14h00	Lunch	Hôtel des impôts
14h00-14h55	Juan Li	Mean-field forward and backward SDEs with jumps. Associated nonlocal quasi-linear integral-PDEs.
15h00-15h50	Daniela Tonon	Variational approach for the planning problem in the mean field games
16h00-16h30	Coffee Break	
16h30-17h20	Gabriel Turinici	From gradient flows to vaccination mean field games numerical schemes
19h45	Social diner	

Wednesday 29th.

Time	Speaker	Title
09h00-09h55	Alexander Lorz	On a Boltzmann mean field model for knowledge growth
10h00-10h30	Coffee break	
10h30-11h20	Francisco Silva	On the variational formulation of some stationary second order MFGs
11h25-12h00	PhD	
12h15-13h50	Lunch	Hôtel des impôts
13h50-14h45	Luciano Campi	N -player games and mean field games with absorption
14h50-15h45	Marcel Nutz	A Mean Field Game of Optimal Stopping
15h50-16h30	Mathieu Laurière	Mean field type control with congestion
16h30	Coffee Break	End of the workshop
