

Séminaire d'Algèbre, Topologie et Géométrie  
lundi 10 mai à 14h30  
Salle II

**Donu Arapura**

Purdue University

**Titre :** *Fundamental groups of (quasi)projective varieties.*

**Résumé :** Since this is a broad topic, I'll survey a small subset of the results and techniques pertaining to the questions : which groups are fundamental groups of smooth complex projective (respectively quasiprojective) varieties ?
